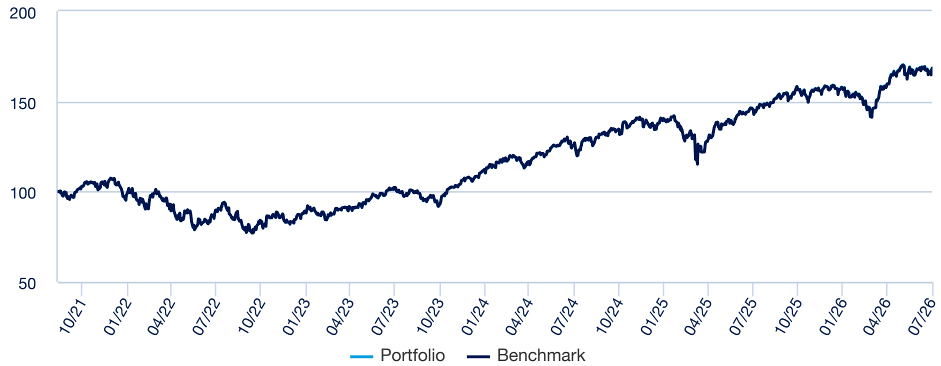
Objective and Investment Policy

The objective of the Sub-Fund is to track the performance of the S&P 500 Net Zero 2050 Paris-Aligned ESG+ Index (the "Index"). The Sub-Fund aims to achieve a level of tracking error of the Sub-Fund and its Index that will not normally exceed 1%

Performances from 10/09/2021 to 31/07/2026 (Source : Fund Admin)



Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility	12.51%	14.70%	17.09%
Benchmark volatility	12.52%	14.70%	17.10%
Ex-post Tracking Error	0.03%	0.03%	0.03%
Sharpe ratio	1.13	0.98	0.43

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk.
The Tracking Error indicator measures the performance's difference between the fund and the benchmark

** Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield** . Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

Risk Indicator *(Source : Fund Admin)*

1 2 3 **4** 5 6 7

Lower Risk — Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the AMUNDI ETF ICAV prospectus.

Index Data (Source : Amundi)

Description of the Index

S&P 500 Net Zero 2050 Paris-Aligned ESG+ Index in an equity index that measures the performance of eligible equity securities from the S&P 500 Index (the "Parent Index") selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario. It incorporates a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risks. The Parent Index is an equity index representative of the leading securities traded in the USA.

MONTHLY COMMENTARY (Source: Amundi)

Management commentary

The eurozone delivered a positive surprise in July, with a preliminary estimate of Q2 growth significantly exceeding expectations. The Q2 flash GDP came in at +0.4% quarter-on-quarter (compared to 0.1% in Q1), bringing annual growth to +1.0% (versus +0.5% in Q1). This rebound follows several quarters of stagnation amid an energy shock linked to the conflict in the Persian Gulf.

The resumption of hostilities in the Persian Gulf weighed on investor sentiment in July. The dominant theme of the month was the sharp correction in semiconductor and memory stocks, which had driven markets higher in the first half of the year. Investors became increasingly skeptical about the future profitability of capex by tech giants in artificial intelligence infrastructure.

MONTHLY COMMENTARY (Source: Amundi)

Management commentary

The decline in US and Asian markets was partially offset by the outperformance of European and Chinese stock exchanges, which recorded gains of +0.5% for the Eurostoxx 50 and +13.9% for the HSCEI. In Europe, several large companies reported strong Q2 results as investors sought new themes. For example, Airbus saw a strong increase in its profits, as did Deutsche Bank and BNP Paribas, which confirmed a significant rise in their earnings.

Oil prices were extremely volatile in July, driven by the ups and downs of the Iran-US conflict. Brent crude reached a peak of $102 before returning to around $90 depending on periods of tension and calm. In the currency market, the dollar depreciated slightly. The euro-dollar moved back above 1.15 at the end of the month. The Fed's decision to keep its key rates unchanged supported emerging market currencies. The yen, meanwhile, appreciated by 3.2% following interventions in the currency market. Gold rose by 1.0% to $4046/ounce but remains under pressure.

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

Evaluation by ESG criteria (Source: Amundi)

	Benchmark	Parent index
Overall Rating	7.13	6.49
Environment	6.83	6.36
Social	5.15	4.91
Governance	5.72	5.43

Parent index : **S&P 500**

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies.

Environmental, Social, and Governance risks and opportunities are posed by large scale trends (e.g. climate change, resource scarcity, demographic shifts) as well as by the nature of the company's operations.

Scores are on a 0-10 scale, with 10 being the best.

"E" for Environment (Climate Change, Natural Resources, Pollution & Waste and Environmental Opportunities)

"S" for Social (Human Capital, Product Liability, Stakeholder Opposition and Social Opportunities)

"G" for Governance (Corporate Governance and Corporate Behavior)

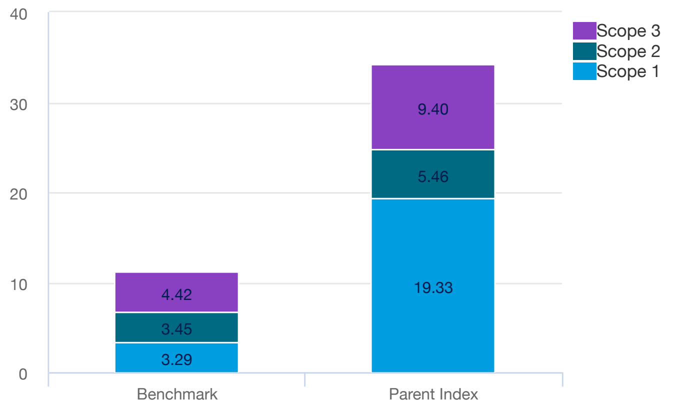
Carbon footprint

Carbon footprint: carbon emissions per euro million invested

	Benchmark	Parent Index
Total carbon portfolio footprint (Index/Parent index) :	13.59	41.21



Parent index : **S&P 500**

Carbon footprint

This indicator measures the portfolio's carbon emissions in metric tonnes of carbon equivalent (tCO2e) per euro million invested.
This is an indicator of the emissions generated by investment in this portfolio.

Definition of scopes :

- Scope 1 : all emissions that arise directly from sources that are owned or controlled by the company.

- Scope 2 : all indirect emissions generated by the purchase or production of electricity, steam or heat.

- Scope 3 : All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3 - Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

Source : The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO2e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO2 equivalent.
