Objective and Investment Policy

The Sub-fund is a passively managed index-based UCITS. The Sub-fund's objective is to replicate, both upwards and downwards, the performance of the MSCI World Net Total Return Index (net dividends reinvested) (the "Benchmark"), denominated in US dollars (USD) and representative of the performance of large- and mid-cap companies in all developed countries, while minimising the tracking error between the Fund's performance and that of the Benchmark. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. More detailed information on MSCI indices is available on the MSCI website (www.msci.com). The Sub-fund aims to achieve its objective by means of indirect replication, namely by entering into one or more OTC swaps (forward financial instruments, "FFIs"). The Sub-fund may invest in a diversified portfolio of international shares whose performance will be exchanged against that of the Benchmark through FFIs. The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundiETF.com. In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Sub-fund's stock exchange websites. In order to hedge the currency risk of the share class against that of the Index, the Sub-fund uses a hedging strategy that reduces the impact of variations between the Index currency and the share class currency.

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-fund's performance. Please refer to the MULTI UNITS FRANCE prospectus.

MONTHLY COMMENTARY (Source: Amundi)

Management commentary

The management objective of the Sub-Fund is to gain inverse exposure with a daily rebalancing to the Italian equity market by replicating, both upwards and downwards, the performance of the FTSE MIB Super Short Strategy RT Gross TR index (gross dividends reinvested) (the "Reference Index"), denominated in Euros (EUR), which represents a short selling strategy (with a daily leverage of -1x) with daily rebalancing, on the FTSE MIB® index (net dividends reinvested) (the "Parent Index"), measuring the performance of the 40 largest stocks listed on Borsa Italiana, while minimizing as much as possible the tracking error between the performance of the Fund and that of the Reference Index. The anticipated level of Tracking Error, under normal market conditions, is indicated in the fund's prospectus. Over a one business day period, any appreciation in the level of the Parent Index will result in an amplified depreciation of the Fund's net asset value, so investors will not benefit from any appreciation in the level of the Parent Index. Over a period longer than one business day, however, due to the daily leverage adjustment performed in the Reference Index, the Fund's performance will not be equal to the inverse of the Parent Index's performance, and may even follow a similar (and not inverse) trend. The FTSE website (www.ftse.com) contains more detailed information on FTSE indices. The Sub-Fund aims to achieve its objective via indirect replication, namely by entering into one or more over-the-counter (OTC) swap agreements (financial derivative instruments, "FDI"). The Sub-Fund may invest in a diversified portfolio of international equities, the performance of which will be swapped against that of the Reference Index through FDIs. The updated composition of the portfolio of securities held by the Fund is available on the amundiETF.com website. In addition, the indicative net asset value is available on the Fund's Reuters and Bloomberg pages and may also be available on the websites of the Fund's listing venues.

Important information

Note on the Fund management company and the fund

The Fund is described in a Key Information Document (KID), or Key Investor Information Document (KIID) for UK investors, and prospectus. The Funds KID, or KIID for UK investors, must be made available to potential subscribers prior to subscription.

The prospectus in Dutch for French UCITS ETFs, for Luxembourg UCITS ETFs and Irish ETFs, and the KID in English are available free of charge on www.amundi.com. They are also available from the headquarters of Amundi Luxembourg S.A. (as the management company of Amundi Index Solutions and Multi Units Luxembourg), or the headquarters of Amundi Asset Management (as the management company of French FCPs and Multi Units France), or at the headquarters of Amundi Ireland Limited (as the management company of Amundi ETF ICAV and Amundi ETF II ICAV). Regarding Funds admitted on a regulated market, the listing is subject to a volatility control mechanisms to ensure that the ETF price does not deviate significantly from a reference price set by the listing rules of the relevant regulated market, notably through the implementation of a trading halt mechanism in case of significant deviation from this reference price.

The Fund offers no capital guarantee. Investors may not get back the full amount of their initial investment, particularly in the event that the benchmark index falls. Subscribing to a UCITS may involve risks. Potential investors are advised to read the Funds risk profile, which is described in detail in the prospectus. The amount that is reasonable to invest in the Fund will depend on the personal circumstances of each investor. To determine this amount, investors should take into account their financial situation, personal assets, and current and future requirements, as well as considering their willingness to accept risks or conversely their preference to invest cautiously. Investors are also strongly recommended to sufficiently diversify their investments so as to avoid being exposed solely to the risks of this Fund. Investors should therefore seek advice in this regard from their usual advisors (legal, tax, financial and/or accounting) before purchasing any units of the Fund.

The source of the data contained in this document is Amundi Asset Management unless otherwise stated.

Policy regarding portfolio transparency and warning on secondary market

The policy regarding portfolio transparency and information on the funds assets are available on amundiETF.com. Shares purchased on the secondary market cannot usually be sold directly back to the fund. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. Investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them.
