## Objective and Investment Policy

The Sub-fund is a passively managed index-based UCITS. The Sub-fund's objective is to replicate, both upwards and downwards, the performance of the FTSE MIB™ Net Total Return Index (net dividends reinvested) (the "Benchmark"), denominated in euro and representative of the performance of the 40 largest stocks listed on Borsa Italiana, while minimising the tracking error between the Sub-fund's performance and that of the Benchmark. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. The FTSE website ([www.ftse.com](http://www.ftse.com)) provides more detailed information about FTSE indices. The Fund aims to achieve its objective through direct replication, i.e. by primarily investing in a basket of assets consisting of the securities comprising the Benchmark and/or eligible financial instruments representing all or part of the securities comprising the Benchmark. In order to optimise Benchmark replication, the Fund may use a sampling technique, as well as guaranteed temporary sales of securities. Any use of these techniques is indicated on the website [amundiETF.com](http://amundiETF.com). The updated composition of the portfolio of securities held by the Fund is mentioned on the website [amundiETF.com](http://amundiETF.com). In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites. The Sub-fund is eligible for the French Plan d'Epargne en Actions (PEA) and, consequently, invests a minimum of 75% of its assets in the shares of European Union countries.

\* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

## EQUITY

## Risk Indicator (Source : Fund Admin)

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-fund's performance. Please refer to the MULTI UNITS FRANCE prospectus.

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.
