Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Description of the Index

The index aims to represent the performance of stocks whose activities are related to water, such as water distribution, utilities and the supply of water-related equipment and water treatment. The index is based on a 'best-in-class' ESG approach, meaning that companies in the bottom quartile by sector-adjusted ESG score are excluded from the theme universe. Companies exposed to controversial businesses, those who are the subject of severe ESG controversy or those who are in violation of the UN Global Compact are also excluded. Further index details may be found at www.msci.com.

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

Evaluation by ESG criteria (Source: Amundi)

	Index	Parent index
Overall Rating	7.45	6.99
Environment	5.81	5.58
Social	5.69	5.46
Governance	6.64	6.46

Parent index : **MSCI ACWI IMI WATER**

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies.

Environmental, Social, and Governance risks and opportunities are posed by large scale trends (e.g. climate change, resource scarcity, demographic shifts) as well as by the nature of the company's operations.

Scores are on a 0-10 scale, with 10 being the best.

"E" for Environment (Climate Change, Natural Resources, Pollution & Waste and Environmental Opportunities)

"S" for Social (Human Capital, Product Liability, Stakeholder Opposition and Social Opportunities)

"G" for Governance (Corporate Governance and Corporate Behavior)

Carbon footprint**Carbon footprint: carbon emissions per euro million invested**

Total carbon portfolio footprint (Index/Parent index) :

Index	Parent Index
90.83	166.07

Carbon footprint

This indicator measures the portfolio's carbon emissions in metric tonnes of carbon equivalent (tCO₂e) per euro million invested.

This is an indicator of the emissions generated by investment in this portfolio.

Definition of scopes :

- **Scope 1** : all emissions that arise directly from sources that are owned or controlled by the company.

- **Scope 2** : all indirect emissions generated by the purchase or production of electricity, steam or heat.

- **Scope 3** : all other indirect emissions, both upstream and downstream in the value chain. To ensure the robustness of the data, in this report we have chosen to use only part of scope 3, i.e. upstream emissions linked to first-tier suppliers. First-tier suppliers are those with which the company has a strong relationship and on which it can exercise direct influence.

Source : The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO₂e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO₂ equivalent.
