Objective and Investment Policy

The Sub-Fund is an index-tracking UCITS passively managed. The objective of this Sub-Fund is to track the performance of the EURO STOXX Select Dividend 30 (Net Return) EUR Index (the "Index"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is a Net Total Return Index: dividends net of tax paid by the Index constituents are included in the Index return. The Index is an equity index representative of the highest-yielding stocks relative to their home market within the Eurozone countries. The Index universe comprises all companies in the EURO STOXX Index that, inter alia, pay a dividend and show a non-negative historical dividend growth per share for the 5-year period as well as a non-negative pay-out ratio (ratio of the dividend to the profit per share) of no more than 60%. The EURO STOXX Index consists of the largest stocks of selected Eurozone countries and is part of the STOXX 600 Index. Components in the Index are weighted by their indicated annual net dividend yield. More information about the composition of the Index and its operating rules are available in the prospectus and at: www.stoxx.com The Index value is available via Bloomberg (SD3T). The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index. The exposure to the Index will be achieved through a Direct Replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and also if it allows a better exposition to an Index constituent. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations. The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges, provided that the Market Makers can maintain market liquidity. Only authorised participants (e.g. selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the prospectus of the UCITS. Updated composition of the Sub-Fund holdings is available on www.amundiETF.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Sub-Fund, and might also be mentioned on the websites of the stock exchanges where the Sub-Fund is listed.

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

	1 year	3 years	Inception to date *
Portfolio volatility	13.07%	13.31%	20.88%
Benchmark volatility	13.06%	13.31%	20.90%
Ex-post Tracking Error	0.16%	0.21%	0.22%

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

Risk Indicator (Source : Fund Admin)

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi Index Solutions prospectus.
