## Objective and Investment Policy

The Fund is an index-tracking UCITS passively managed. The investment objective is to track both the upward and the downward evolution of the MSCI Brazil Net Total Return Index (Net dividends reinvested) (the Benchmark Index"), denominated in US dollars (USD) and representative of the Brazilian stock market while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus. MSCI's website (www.msci.com) contains more detailed information about the MSCI indexes. The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI").The Fund may also invest in a diversified portfolio of international equities, whose performance will be exchanged against the performance of the benchmark Index via the FDI. Updated composition of the Fund holdings is available on www.amundietf.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.
